

## INDEX

| <b>Sr. No.</b> | <b>Contents</b>   | <b>Page No.</b> |
|----------------|---|-----------------|
| 1              | Emergency preparedness in the face of zoonotic disease outbreak                                       | 1-12            |
| 2              | CCHF:An emerging tick borne metazoonosis  | 13-22           |
| 3              | Molecular detection of zoonotic pathogens   | 23-43           |
| 4              | Parasitic zoonoses in India: An overview  | 44-54           |
| 5              | Wild Life disease ecology   | 55-58           |
| 6              | An overview on zoonotic diseases of equine  | 59-73           |
| 7              | Zoonotic diseases: Status update in India   | 74-85           |
| 8              | Food safety and quality: emerging importance  | 86-100          |
| 9              | Monitoring Water and air quality for improving environmental health                                   | 101-107         |
| 10             | Veterinary drug residue in animal food products: Risk factors and significant impact on public health | 108-117         |
| 11             | Foodborne zoonoses and control strategies   | 118-131         |
| 12             | National and International Food Safety Standards  | 132-138         |
| 13             | Overview of Disaster Management   | 139-155         |
| 14             | Xenotransplantation and its Application   | 156-163         |
| 15             | An update on techniques to detect food adulteration   | 164-173         |
| 16             | Community Based Approach for control of Zoonotic Disease  | 174-186         |
| 17             | Reproductive management of bovines to improve milk production.  | 187-194         |
| 18             | Climate change: Impact on animal health and biodiversity  | 195-202         |
| 19             | Role of Veterinarians in control of Emerging Zoonoses   | 203-211         |
| 20             | Understanding of basics of Reproductive Ultrasonography and its applications in Animals               | 212-222         |
| 21             | Risk Assessment and Strategies to prevent Antibiotic Resistance                                       | 223-231         |
| 22             | Differential staining techniques for bacterial identification   | 232-238         |

|    |   |         |
|----|---|---------|
| 23 | Role of Mass Media in Creating One Health Awareness             | 239-243 |
| 24 | Post – mortem disease diagnosis of important infectious disease | 244-253 |
| 25 | Nutritional management of livestock during disasters            | 254-264 |
| 26 | Essentials of Biosecurity in Broiler Production                 | 265-269 |
| 27 | Feeding of bypass nutrients to improve animal performance.      | 270-277 |
| 28 | Early warning system for Livestock and Zoonotic diseases        | 278-287 |
| 29 | Global Health challenges and food security                      | 288-295 |
| 30 | Bacterial zoonoses and approaches to their management           | 296-304 |
